## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q1

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Sabrina is working on a project that involves analyzing a set of numbers. In her exploration, she encounters scenarios where extracting even numbers and finding their sum is essential.

Create a program that calculates the sum of even numbers from a given array of integers using a lambda expression.

##### ***Input Format***

The first line of input consists of an integer N, representing the size of the array.

The second line consists of N space-separated integers, representing the elements of the array.

##### ***Output Format***

The output prints the sum of the even integers from the array.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 3

29 37 45

Output: 0

### **Answer**

```
import java.util.*;
import java.util.function.*;

class Main {
    public static void main(String[] args) {
        Scanner scan = new Scanner(System.in);
        Predicate<Integer> e = (m) -> m % 2 == 0;

        int n = scan.nextInt();
        int s = 0;

        for (int i = 0; i < n; i++) {
            int x = scan.nextInt();
            if (e.test(x)) {
                s += x;
            }
        }

        System.out.println(s);
    }
}
```

**Status : Correct**

**Marks : 10/10**
